

# VoxPro PC

# \$999

Voice and phone editing so affordable  
you can network one in every studio!

## Make the VoxPro Switch

Audion Labs' award-winning digital audio editing software's new price of \$999 includes VoxPro Network. Now you can place a VoxPro PC in every studio and network them together to make the ultimate audio development, distribution and management system throughout your station.

## Only VoxPro PC

No other digital audio editor in the world has the ability to copy and move *multiple* files from room to room, create files and instantaneously share them with other selected workstations, and provide access to on-air files from another studio when you're off the air.

## What They're Saying

*"Never has one piece of equipment made such a difference in the air staff's ability to build great quality content fast. And they learned it within minutes without having to spend a boatload of time training on it. It is that simple to operate and use."*

Bob Case, VP Programming,  
Clear Channel - Seattle.

VoxPro PC is digital editing software that installs on your Windows® 2000 or XP computer. VoxPro PC is shown here with its 8"x10", optional VoxPro PC control panel and simple user interface display on a flat panel monitor.

## The Right Numbers

VoxPro PC software with VoxPro PC Network is available for \$999 MSRP. VoxPro PC control panel is also available for \$999 MSRP. Reseller prices may vary. For a complete list of software, network and control panel features go to [www.audionlabs.com](http://www.audionlabs.com), email [sales@audionlabs.com](mailto:sales@audionlabs.com) or call 206.842.5202 x204.

# VoxPro PC

## Fast Voice and Phone Editing

Bottom line, if you're recording voice tracks or using phoners on the air, it's *all* about time. Imagine editing twice as fast as any Short/cut™ or Cool Edit™. VoxPro is blazingly fast because it's simple to learn and simple to use.

## What's Not to Like?

It's fast. It's easy. It imports WAV, WMA, MP2, MP3. It networks from VoxPro to VoxPro across your existing LAN. It's \$999 for software and \$999 for the optional control panel. You can use it on existing CPU's in your control room. So, what's not to like? Nothing!

## Stop Buying Parts

Trying to keep an old editor running? Replacing part after part just to keep it alive? Might be about time to invest in a robust editing alternative that will take you into the next decade. VoxPro PC is totally optimized for digital audio editing across your entire station's existing network.

*"My nationwide country show is so phone intensive! I totally rely on VoxPro PC's speed and rock solid dependability. I couldn't part with it. Thank you Audion Labs!"*

**Lia**, 3 million country listener super jock. Distributed by Jones Radio Networks.

## VoxPro PC Features

- Imports and edits all popular formats including MP3.
- Records host in one channel, caller in another and plays back in stereo or mono.
- Networks on NT, Novell or peer-to-peer networks.
- Remotely starts record, play, and stop from your console.
- Lists file titles and sorts by name, length and modified time.
- Scrubs audio using jog wheel or buttons.
- Unlimited undo's and redo's for life of file.
- Copies or moves multiple files from folder-to-folder and room-to-room.
- Opto-Iso tally in record mode for on-air lights.
- One button Insert Record automatically sandwiches new audio into existing recordings. (Great for coaching listeners to give response you want!)

## And More...
